

As an AWS partner since 2015 with networking and security competencies, Aviatrix enhances your AWS network, providing a streamlined, secure, and cost-efficient environment to support the dynamic needs of modern businesses. Aviatrix participates in both the AWS Independent Software Vendor (ISV) Accelerate Program and the AWS SaaS Revenue Recognition Program (SRRP).

- Security Software Competency
- Network Software Competency

Key Benefits of Aviatrix on AWS

Simplified multicloud network management for AWS networks

Aviatrix Cloud WAN Connector

- Automatically connects the Aviatrix cloud network to AWS Cloud WAN
- Extends AWS Cloud WAN capabilities across multiple cloud providers
- Uses event-driven automation for seamless, zero-touch configuration

Modernize partner and customer connectivity for AWS

Aviatrix Secure B2B Partner Connect

- Automated IPsec connectivity to partner and customer sites
- Advanced troubleshooting and visibility with embedded security
- Fully automated and repeatable with Terraform

Liberate your data and enable AI in AWS

Aviatrix Secure Edge for Equinix and Datacenter

- Get up to 20 Gbps of end-to-end encryption from Equinix or DC into AWS
- Ideal for high performance, low latency data demands of AI and LLM apps
- Greater flexibility and optionality with your hybrid and multicloud AI designs

Control networking and security costs in cloud

Aviatrix Cost Optimization for AWS

- Provide hard dollar savings, averaging 20-30%, on your AWS networking spend
- Gain clear insight and control over complex cloud pricing dimensions
- Move to a distributed security model and cut wasteful spending on firewalls
